Homework 4
Due Thursday, October 27th

Readings

Read the material distributed in class on Thursday. There are also a few papers on data visualization techniques linked from the class web-pages: you might select one of these instead.

Essay

Looking at the newspaper and current on line media, identify a graph that you find particularly attractive or particularly ineffective. Print a copy, describe it, and argue about your point. (In keeping with the census theme of the post you could look at [http://www.census.gov/library/infographics.html](http://www.census.gov/library/infographics.html) which is related to the World Statistics Day).
